### Supplementary Figure 3.

Examples of embryos in which *Cer-1*/GFP positive cells lose expression (A, white arrow) or divide (B, white arrow) during culture from E4.75. Note that only one of the z-planes is shown.

The times on each panel indicate the time after the time-lapse had been started. The corresponding schematic diagram for each of the embryos is shown for each panel and the tissues are indicated.

Epi, epiblast, VE, visceral endoderm; ExE, extraembryonic ectoderm. Scale bar = 100 $\mu$ m.
